

BOX MAT

Stop messing around with mats that creep around your gym. Nobody likes a creeper! **The Box Mat** is designed to interlock together for a stable no-creep fit.

The Box Mat was originally designed to withstand the weight and punishment of elephants. Seriously, elephants! They're that durable. With a 3/4" thickness, these mats are built to last and protect what's above and below them.

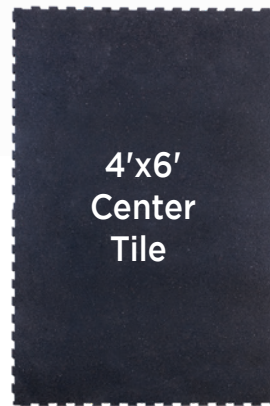

Additionally, **The Box Mat** is made from 100% closed-cell re-vulcanized rubber and will never absorb moisture, bacteria, or viruses.

Our pebble top design adds the right amount of grip and traction for intense workouts. The air channel bottom helps prevent moisture buildup that can lead to mold and mildew.

The Box Mat is built to last, built to be safe, and built to perform.
