

PAVIGYM PREMIUM VULCANIZED RUBBER

THE BASIS OF FITNESS

EXTREME S&S

EXTREME S&S is specifically designed for heavy duty weight areas where the maximum level of resistance and sound absorption is needed. Offering better comfort, thermal and sound insulation, and resistance to damage and marks than the standard version, EXTREME S&S truly is the ultimate technical weight room flooring.

Despite being the most resistant and hardcore of all our flooring, EXTREME S&S still offers maximum comfort thanks to its thickness and blend of virgin and recycled rubber.

EXTREME S&S is designed to resist the heaviest loads, but that doesn't mean all it does is resist marks. It also offers fantastic vibration absorption to protect your sub-floors, and which also reduces sounds. As with all our flooring, it's also impermeable, resisting sweat and spills and making it easy to clean after those heavy lifting sessions.

WHERE TO USE:

- Any Area That Requires Noise & Impact Abatement
- Cardio Areas
- Selectorized Areas
- Free Weight Areas
