

# PAVIGYM PREMIUM VULCANIZED RUBBER

THE BASIS OF FITNESS

## EXTREME

EXTREME is a technical flooring for free weights and cardio that truly lives up to its name. The high resistance to impacts it offers means its a durable and resilient flooring solution that doesn't show signs of wear, making it the best weight room flooring option. Its hardcore aesthetic adds to the style of your gym while improving on weaker flooring that rips and tears up.

The most resistant PAVIGYM surface, EXTREME features high impact absorption of falling objects and excellent resistance to marks. Manufactured using recycled ENDURANCE flooring, it offers an increased level of resistance to damage in heavy weight training areas, as well as a more aggressive, tougher look.

EXTREME won't let you down when its time to clean up. The impermeable virgin and recycled rubber surface won't absorb sweat or any other liquids, and the interlocking system prevents anything seeping in between tiles and causing bad odour over time. Its excellent properties make this easy to clean solution the best flooring for free weight areas.

## WHERE TO USE:

- Cardio Areas
- Selectorized Areas
- Free Weight Areas
- Home Gyms
